Mission Statement.

we are comitted to providing high quality service to meet the specific requirements of our clients in this volatile environment.

Recruitment

The Aviation industry is changing and airlines require greater exibility regarding its employees. Candidate's views regarding the industry are also changing and our research shows quality of life and time at home is diminishing in today's working patterns.

By combining both the requirements of the client and the candidate we believe we can provide a cost effective and unilateral quality environment for companies and individuals to thrive.

Services

Ryan Aviation has built up a database of professional flight deck crew who are current, available and understand what is involved in the successful completion of a contract agreement. This willingness and understanding gives the client an invaluable crew member who will immediately fit into their organisation. Crew will be monitored on a regular basis to ensure a smooth transition into their new assignment which in turn relieves your HR department of increased workload for additional crew members. A stream of current professional and referenced checked crew across all aircraft types allows fast and efficient dispatch.

Each candidate on our database is current on their licenced aircraft type. A current medical certificate and OPC/LPC are assured. Qualifications are subject to meet your requirements.
